

Make Some Binoculars or Googly Eyes!

- 1 How to make:**
Save 2 pots from a pack of Yeo Valley yogurts and stick them side by side.

Tip: Make sure you've eaten your yogurt and your pot is empty!

- 2** Ask a grown up to cut a hole in the bottom of each pot so that you can see out of them. They'll also need to punch holes either side of the binoculars to fasten elastic.

- 3** Your binoculars should look like the picture above.

What can you see with your binoculars?
