Dear xxx

As the festive season creeps upon us, we're busy finalising our plans for next year. On the farms, preparations and maintenance are busily taking place in readiness for the Winter months which includes hedge laying, pictured above. This may look brutal but the resulting hedges create a valuable wildlife habitat and corridor. As it starts to become chillier outside, why not give our scrumptious Winter recipes a try? They're perfect for warming you up after Christmas shopping or a lovely walk in the countryside. Enjoy!

## The perfect ingredient!

Psst! We thought we'd let you into a kitchen secret that will save you a few hours in the kitchen this winter – even Delia loves it!

Our range of organic fruit compotes are the perfect ingredient for home baking – be it a moreish filling for home cooked fruit crumbles and pies, a topping for cheesecakes, or simply drizzled over ice cream or thick Greek Yogurt. They will help save you time on all that peeling, chopping and simmering and are available in three delicious flavours including Orchard Fruits (plums, apples and cherries), Apple & Berry and Summer Fruits (strawberries, raspberries, redcurrants & cherries).
